LEADING NEW ICT

Future-Oriented Education Concept — from Formalism to Personalization Education

VS.

Formalism Education

Stereotyped teaching subjects

Education is run under the mode of industrialized operations.
Students' learning and growing results are the same.

Personalization Education

Innovative sprouts

Every student is not the same.

They are unique individuals
with different needs and desires.

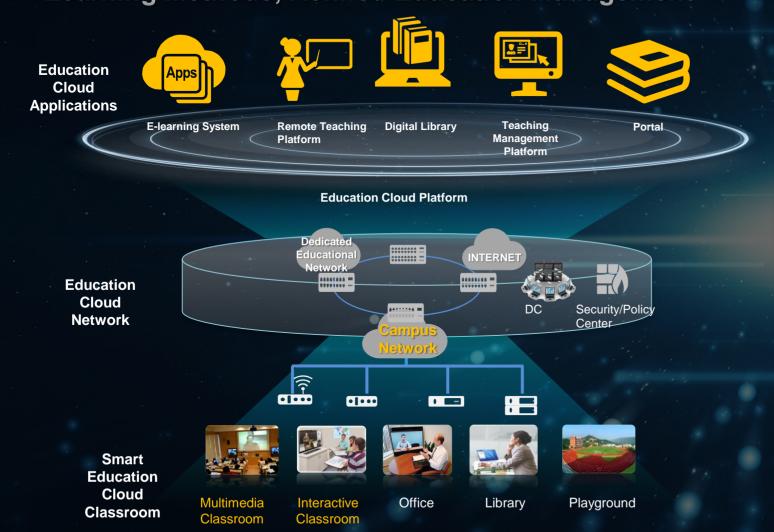

Personalization education (progressive education)

advocates student-centered courses with the life as the content, and teaching methods of solving problems, which weakens the authority consciousness of teachers, puts emphasis on the cooperative spirit of schools and realizes individualized teaching.

ICT Promotes the Development of Personalization Education

Huawei Education Cloud Solutions — Innovative Education Models, Enrich Learning Methods, Refined Education Management

Unlimited sharing: education cloud applications

- future-oriented, cutting-edge experience
- Ubiquitous access eliminates informationsilos
- Actively learning anytime and anywhere

Promote fairness: education cloud network

- Implement interconnection with different schools downwards and interconnection with higher-level education management institutions upwards
- Different services are used with the VPN tunnel for security transmission to implement security isolation.

Free learning: education cloud classroom

- Improve the study and management efficiency
- · Achieve high-quality resource sharing

Online Learning Platform

- Outmoded content
- Single model

- Single learning place
- Lack of communication between teachers and students

- Lack of high-quality resources
- Lack of sharing

Convenient Communication

Improving the Learning Efficiency

earning Anytime and Anywhere

Convenient Course Arrangement

Convenient Course

Management

Customized services

Customize products for customers based on different service requirements

Copyright Protection

Multi-aspect learning quality assurance

Tracking the learning based on learning plans. stage assessment of learning effect based on the examination points, fair exam management based on on-line examination.

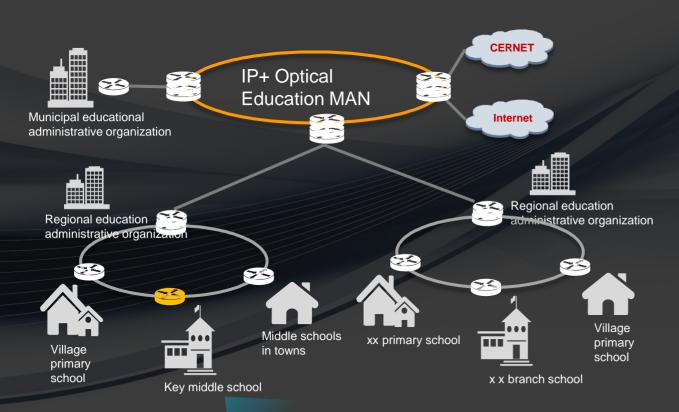

Open interfaces with copyright protection

RTMP as the streaming media transmission protocol

prevents video resources from being obtained illegally and opens the introduction of the thirdparty resources.

Education MAN — Interconnection between Schools

High-speed core network

Cloud Applications

Two-layer-based network structure enables reliable interconnection with education administrative organizations

The VPN multi-service bearing ensures service quality

High reliable MAN

Fast convergence of hardware BFD in 200ms enables education applications uninterrupted

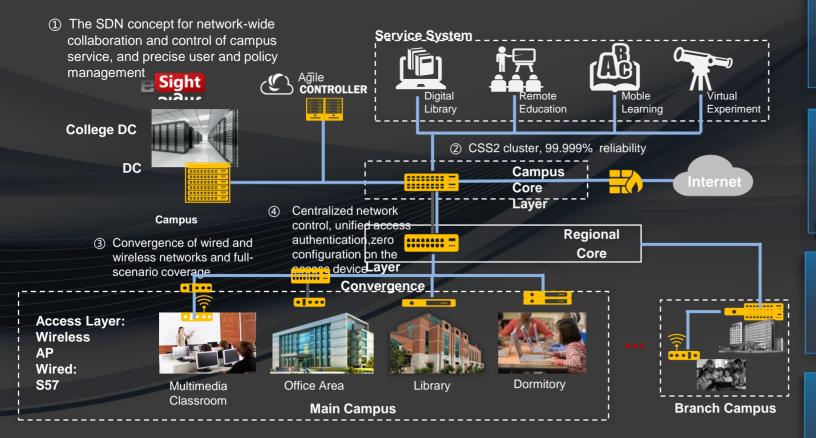

3G network backup for access to the network at any time

High-quality access network

The MPLS VPN multicast scheme ensures the service quality of educational videos

Five-level QoS scheduling ensures school teaching services first

Agile Campus Network

Access to the network anytime anywhere

 High-performance wireless network coverage for campus, inceasing the covering area by 20% and reducing hardware investment

Teaching services integration

- •integrated wired and wireless network
- •Open service interfaces and unlimited expansion of education cloud service

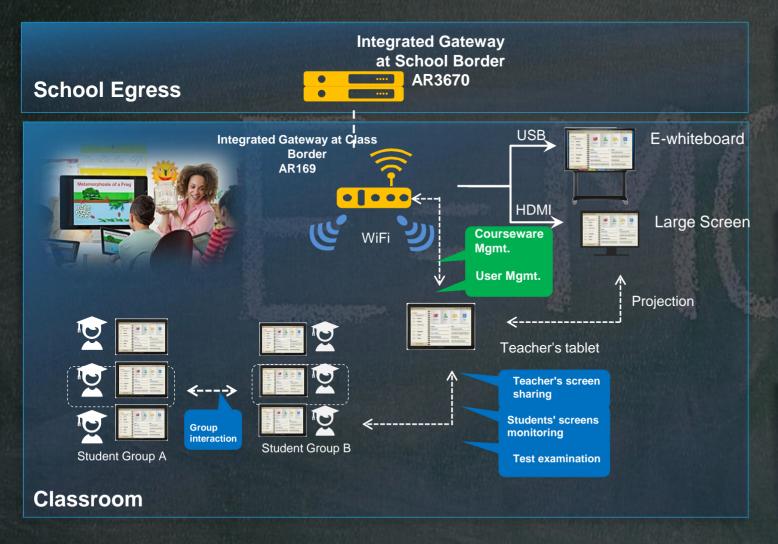

Simplifying network management

 Fast device deployment, automatic planning/ optimization/ inspection

Ensuring the network access security

- User-based in-depth application traffic control
- Convenient online source tracing prevents the illegal behaviors from hiding

Smart Classroom — Interactive Teaching Solution

Interactive mode improving learning interest

Support regional resource sharing, multiple types of test items, easy to find key and difficult points, good effects of microclass tools

Cloud Network

All-in-one gateway, easy to maintain

CCE integrated with gateway, switch, USB, Bluetooth, WIFI, local interaction platform and many other functions

Intelligent terminal management improves teaching efficiency

Any office realizes the application management and control of Huawei Pad.

Smart Classroom — Solar Power Integrated Classroom

Housing design and internal devices can be customized as required Installation Convenient Solar power Environmental Convenient workload: anti-seismic Windproof Customized installation protection transportation supply position 1person/day

Various network access modes

Wired, wireless, 3/4G meets the requirements of remote areas

Cloud Network

Green energy-saving

Solar energy utilization rate is increased by 30%

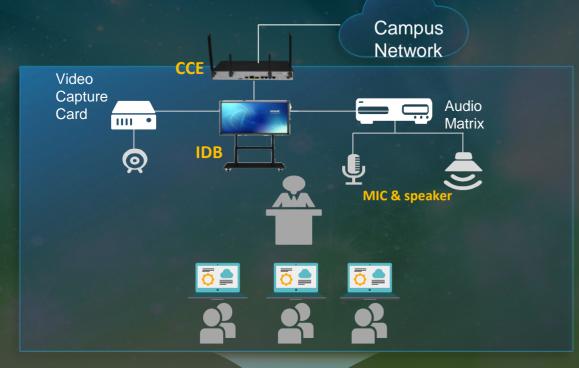

Multiple power supply modes

Support multiple kinds of power supply systems, such as solar energy, batteries, mains supply, generators

Secure and reliable

Integrated with access control, fire alarm and monitoring systems, ensuring the school safety

Smart Classroom — Multimedia Classroom

Break the limit of the traditional teaching

- Real-time P2MP distance education
- Offline recording and playback

Simplify multimedia device deployment

- WIFI and PC, all-in-one projection, saving investment
- Electronic whiteboard and VoIP-assisted teaching improve the teaching efficiency

Rich multimedia teaching resources

• Multiple formats, such as video, flash and office 7x24 uninterrupted sharing

Huawei Education in the World

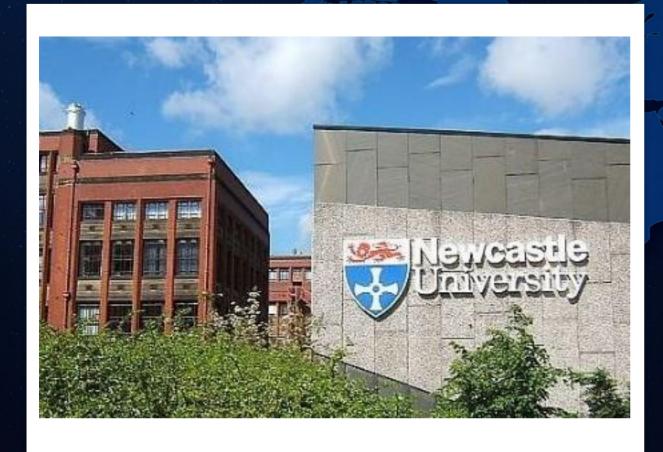

70+ countries and regions

120+ universities cooperation

"Telecom Seeds for the Future" Program

5000 + HAINA* professionals

Colleges and universities

Newcastle - UK

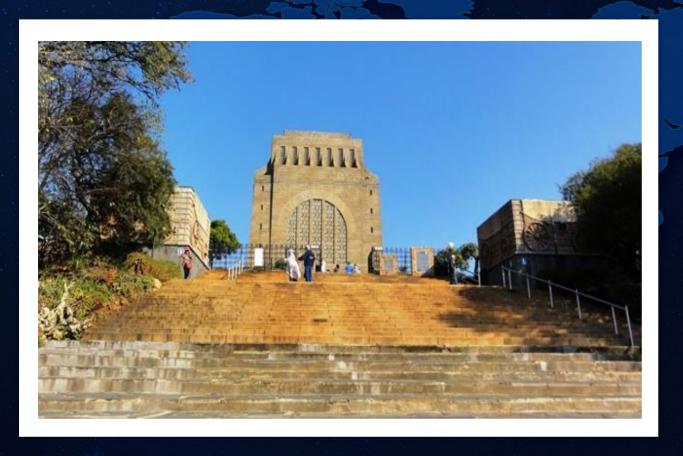

Solution

- 100G links between Campus core and DC
- 2000+ WLAN APs deliver full WIFI coverage
- Unify User management

Benefits

- Upgrade the speed of the campus network
- Make network higher scalability and availability
- TCO reduction by Green and compact design

Interactive learning

Gauteng, South Africa

- Build Unified Regional Education Cloud
- Cover 2200 Schools
- Provide 88000 E-Schoolbags

"We therefore elected an e-Learning solution that could mediate the curriculum meaningfully, and in a sustainable manner, whilst being financially viable."

> Phumla Sekhonyane Head of Communications for the Gauteng Department of Education
